Software Installation

Apache NetBeans Installation

1. Click the link below:

<https://netbeans.apache.org/download/index.html>

and click the button Download.

2. Go to the installer and click the first link.

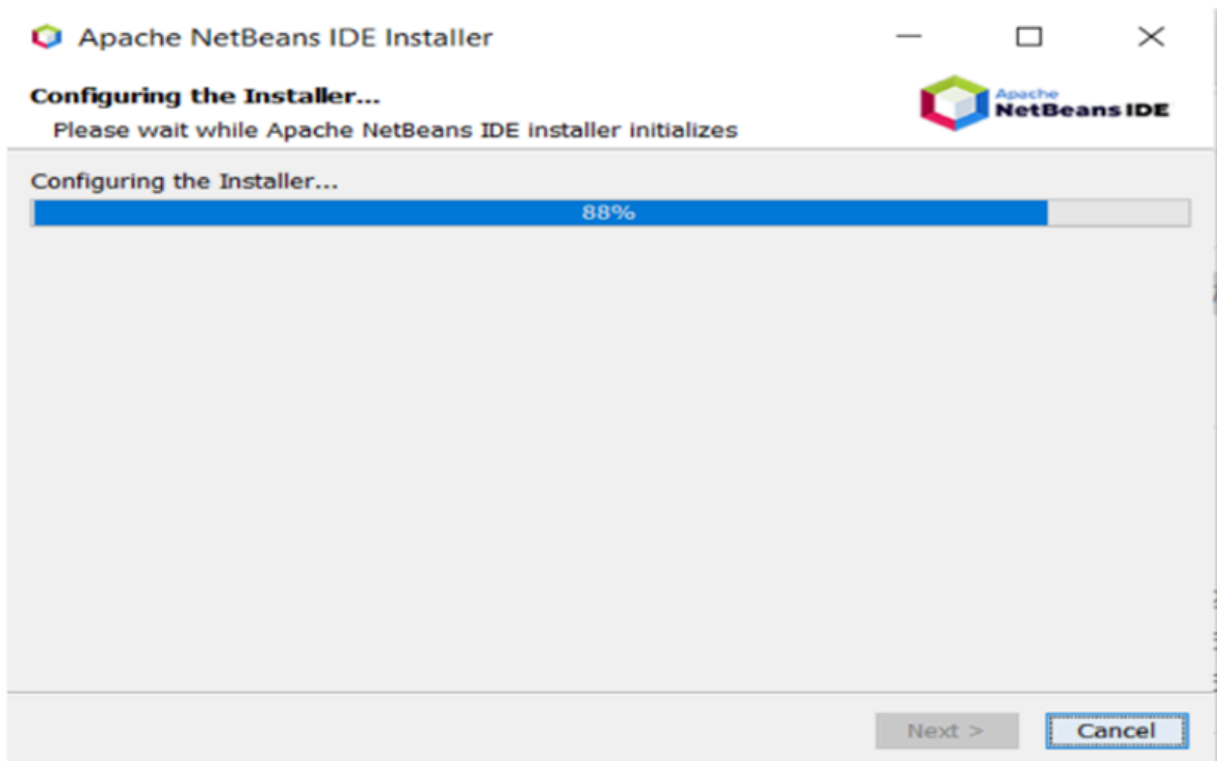

3. Next, go to the first link and click the execution files and it will start downloading.

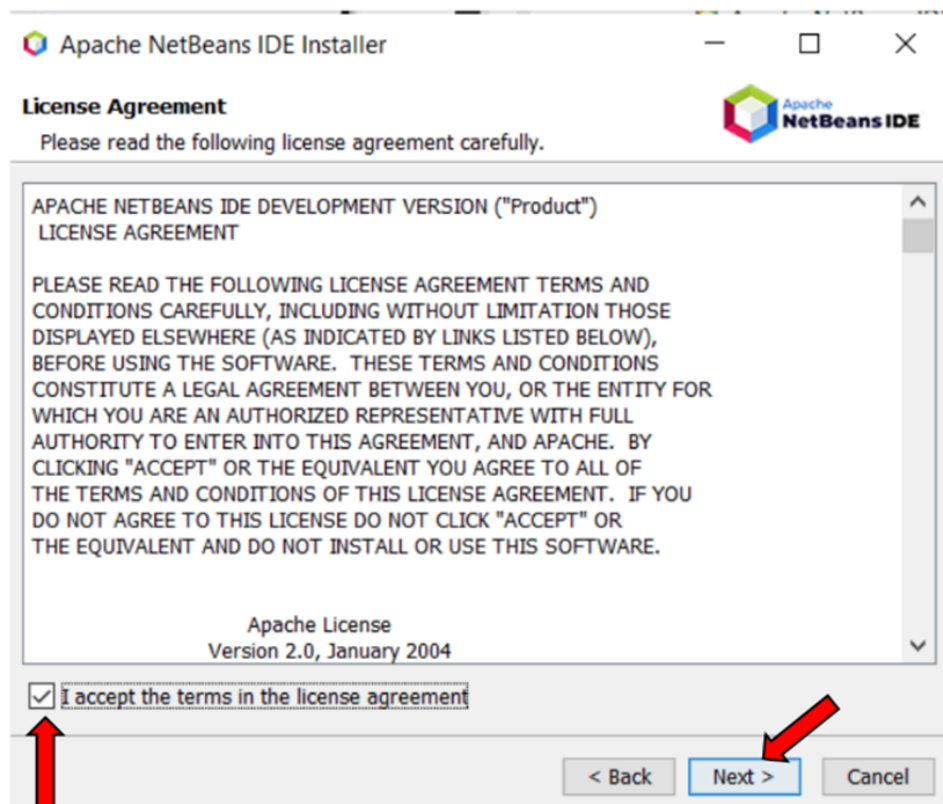

The screenshot shows the Apache Software Foundation website. The top navigation bar includes links for News, About, Make a Donation, The Apache Way, Join Us, and Downloads. The main header features the Apache logo and the text "COMMUNITY-LED DEVELOPMENT 'THE APACHE WAY'". Below this, there are links for Projects, People, Community, License, and Sponsors. The main content area suggests a download site for the Apache NetBeans IDE installer, with a red arrow pointing to the link: <https://dlcdn.apache.org/netbeans/netbeans-installers/16/Apache-NetBeans-16-bin-windows-x64.exe>. It also provides alternate download locations and instructions on how to verify the integrity of the downloaded file using PGP signatures or hashes. The section is titled "HTTP" and "BACKUP SITE".

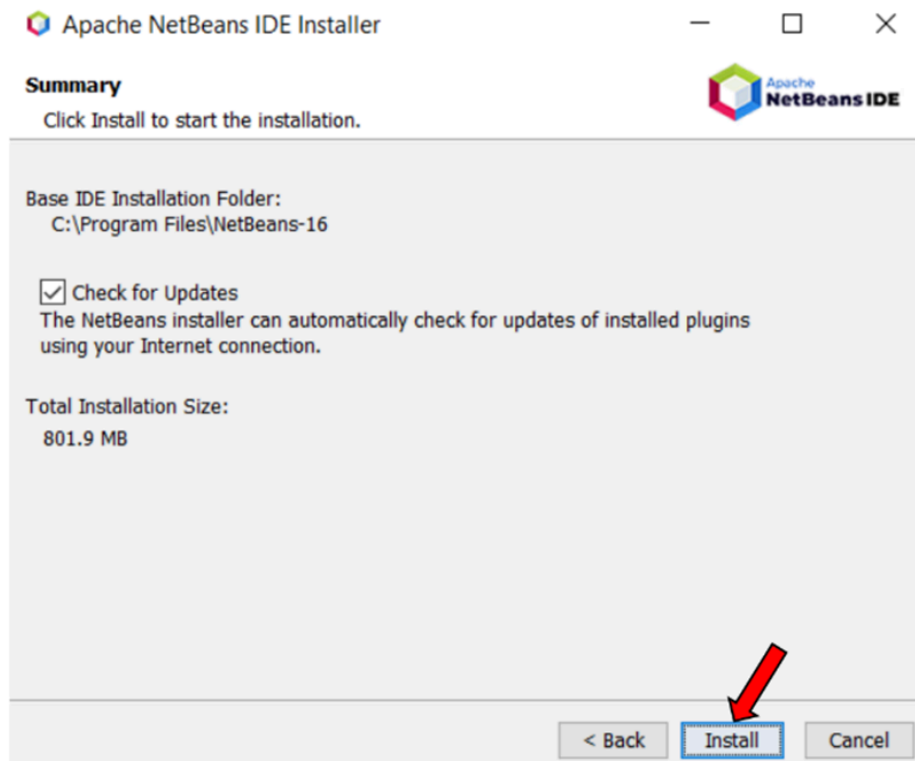

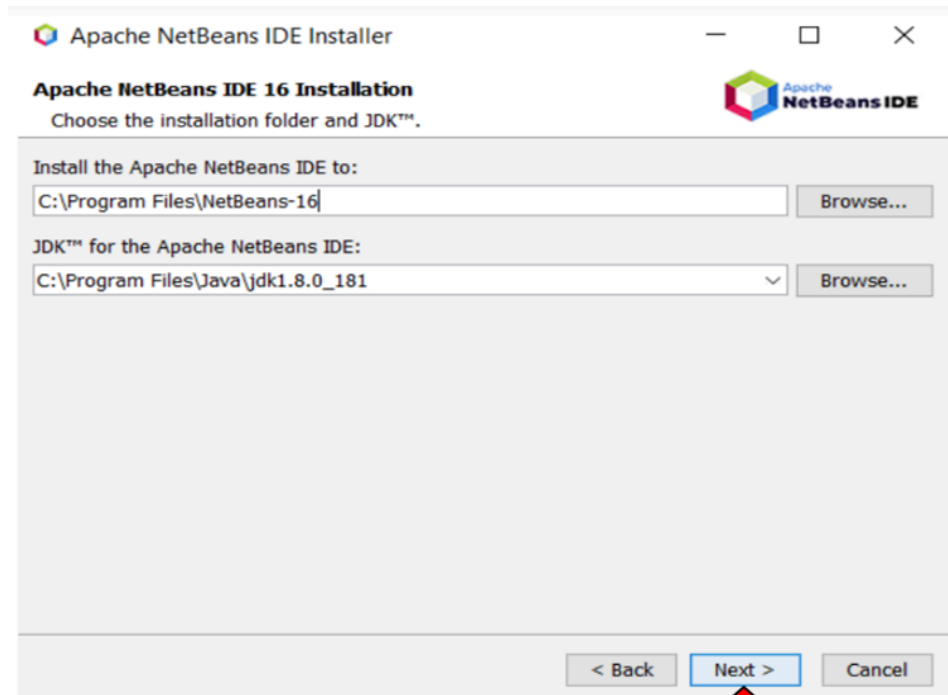

4. After the execution file is downloaded, then you can start with the installation process by clicking open/run and following the installation process.

5. Check the checkbox and click Next button

Apache NetBeans IDE Installer

Setup Complete

Click Finish to complete the Apache NetBeans IDE setup.

Installation completed successfully.

2 updates successfully installed.

To launch the IDE, use either the Start menu or the Apache NetBeans desktop icon.

To change installed components and add NetBeans plugins, use Plugin Manager that is an integral part of Apache NetBeans IDE.

Finish

XAMPP Installation

1. Click the link below:

<https://www.apachefriends.org/download.html>

and click the button Download (64 bit) for 8.2.0/PHP 8.2.0 version.

Version	Checksum	Size
8.0.25 / PHP 8.0.25	md5 sha1	143 Mb
8.1.12 / PHP 8.1.12	md5 sha1	147 Mb
8.2.0 / PHP 8.2.0	md5 sha1	148 Mb

Requirements More Downloads »

Windows XP or 2003 are not supported. You can download a compatible version of XAMPP for these platforms here.

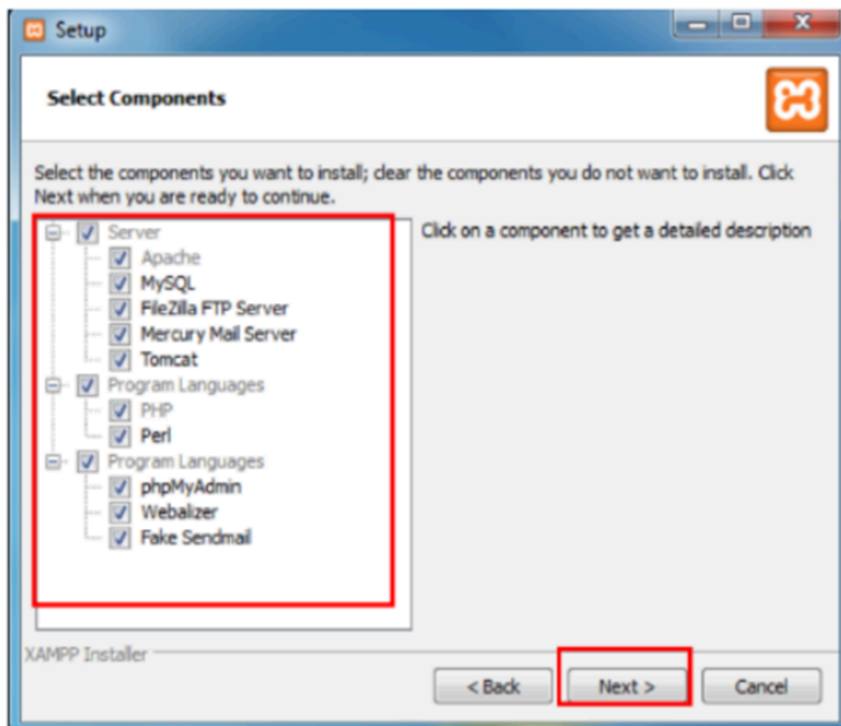

2. Run the installer

 xampp-windows-x64-8.2.0-0-VS16-installer

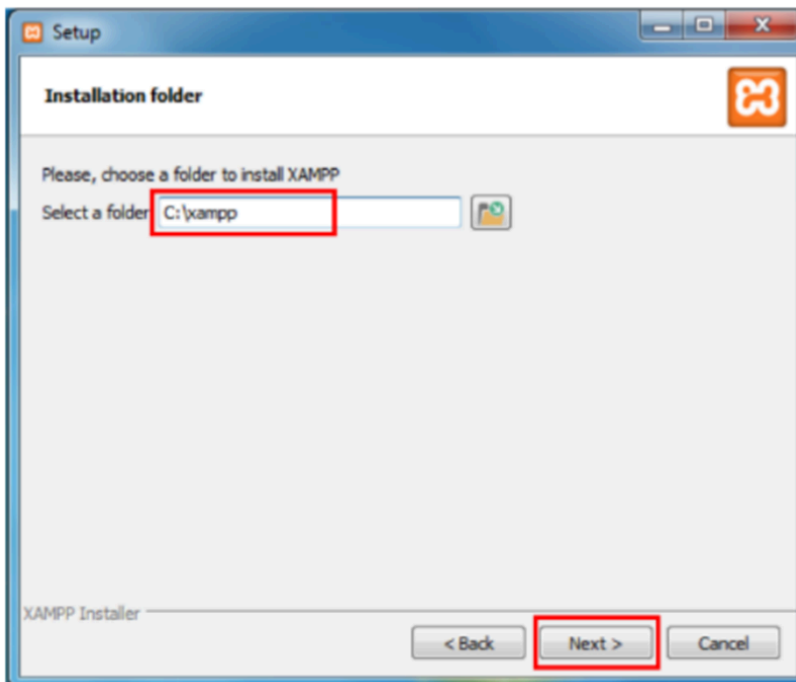

3. Click Next in XAMPP Setup

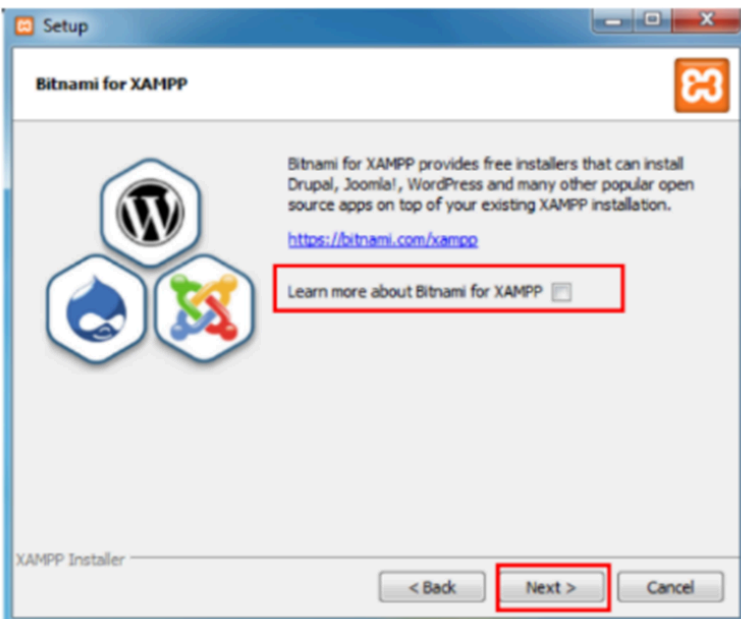

4. Select all components (selected by default), then click Next button.

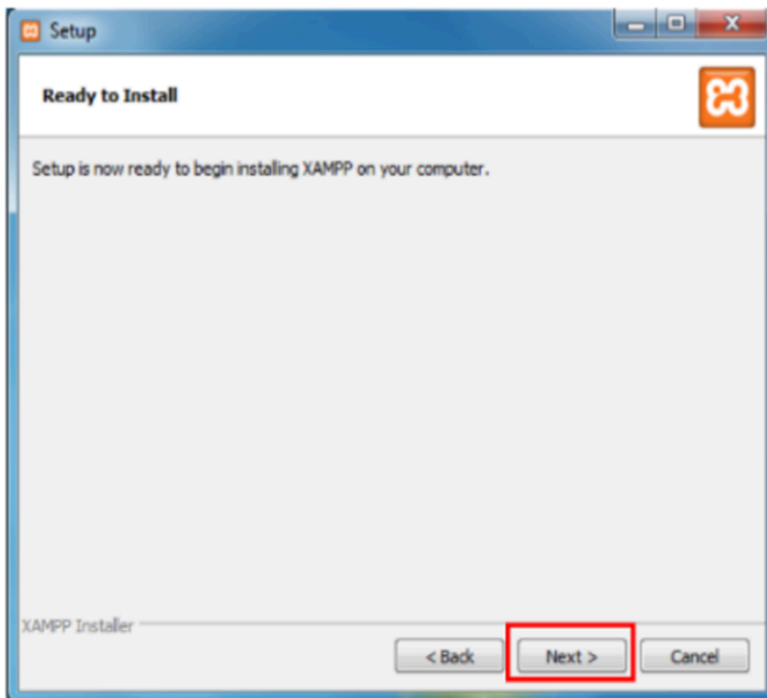

5. Select a folder to install XAMPP, C:/xampp (by default), then click Next button.

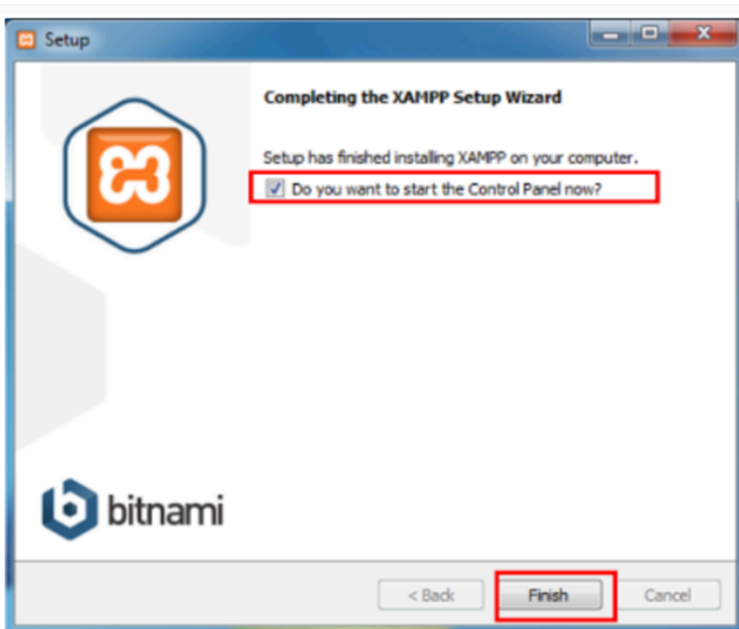

6. Unselect Learn Bitnami, then click Next button.

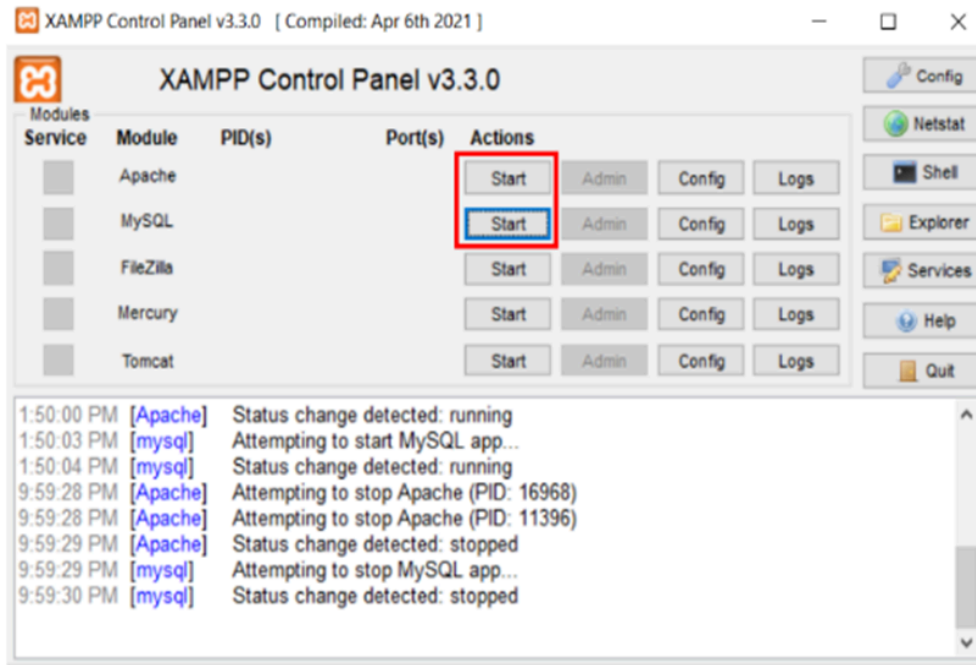

7. Setup is now ready for installation, then click Next button

8. Start Control Panel, then click Finish button

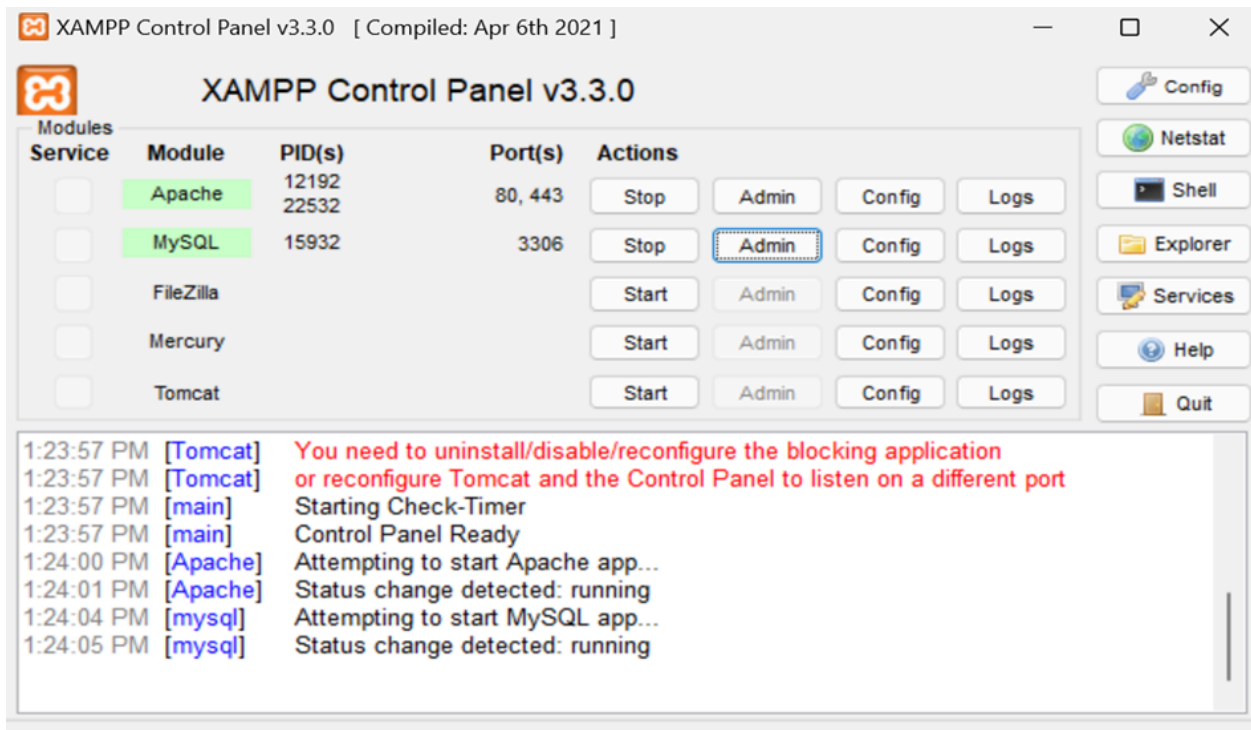

9. Click Start button for Apache and MySQL

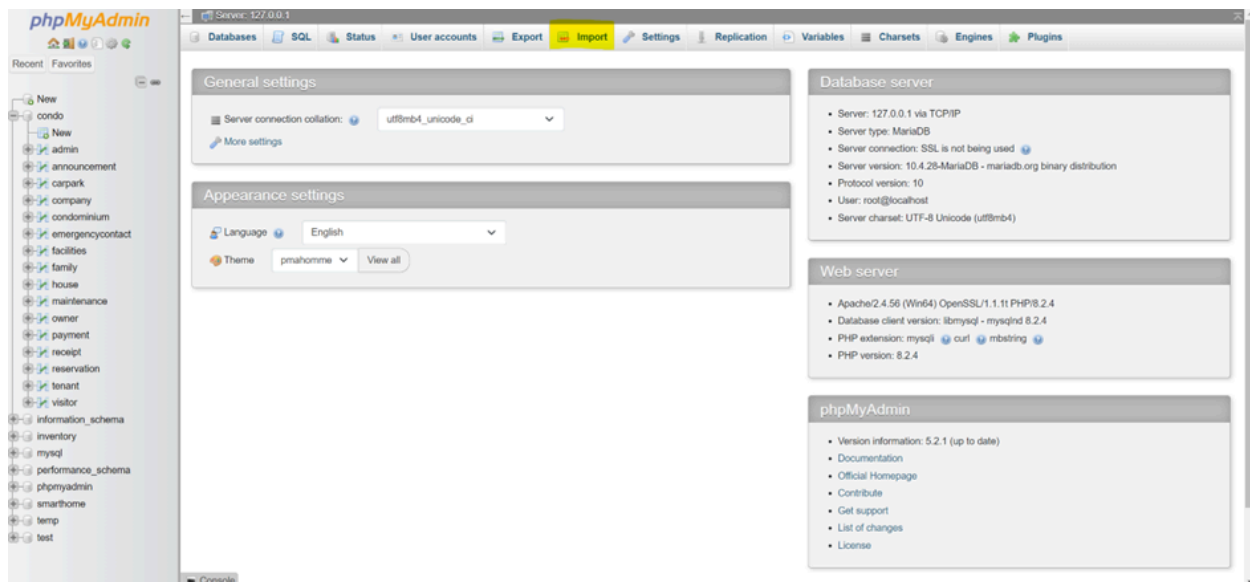

Import Database

1. Open XAMPP, click the start button for Apache and MySQL. After that, click the admin button for MySQL.

2. Click the Import button.

3. Click "Choose File", select the database file (CondominiumDatabase.sql) in the SQL file type, and then click the "Go" button in the lower left corner to import the database file.

File to import:

File may be compressed (gzip, bzip2) or uncompressed.
A compressed file's name must end in `[format].[compression]`. Example: `.sql.zip`

Browse your computer: (Max: 40MB)

Choose File No file chosen

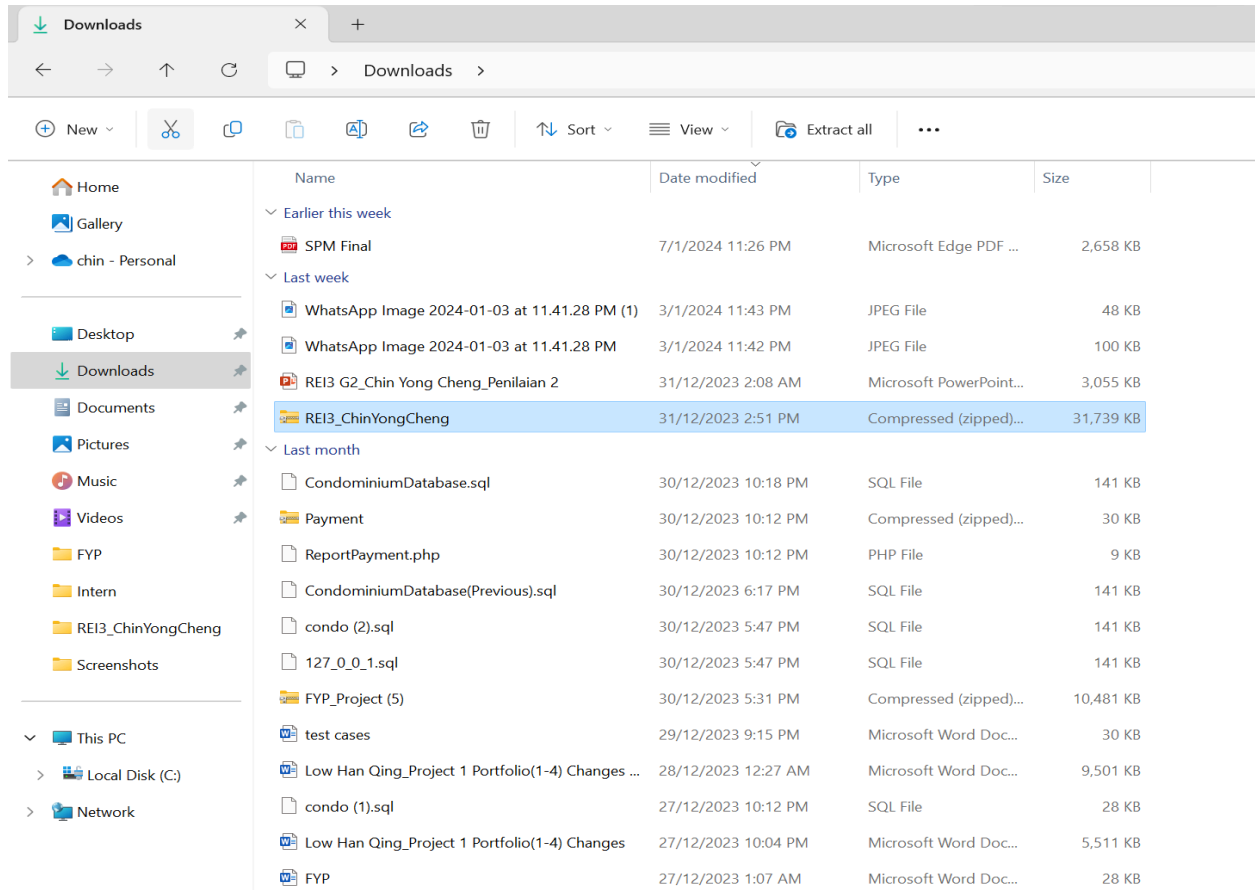

You may also drag and drop a file on any page.

Character set of the file:

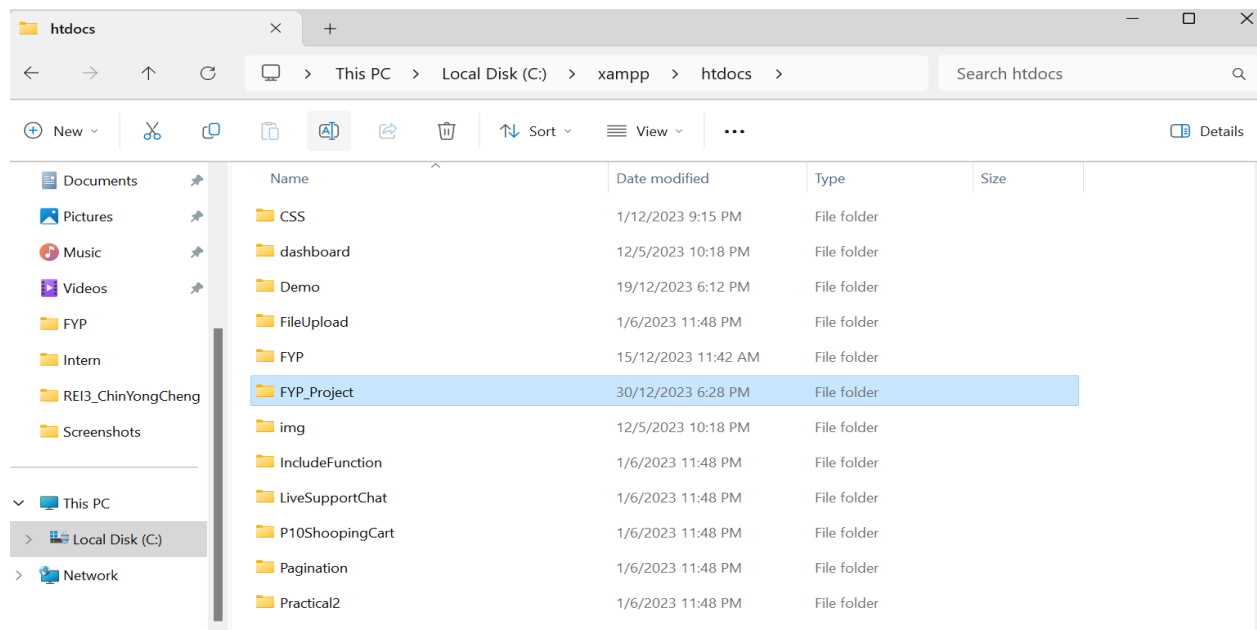

utf-8

How to Run Project

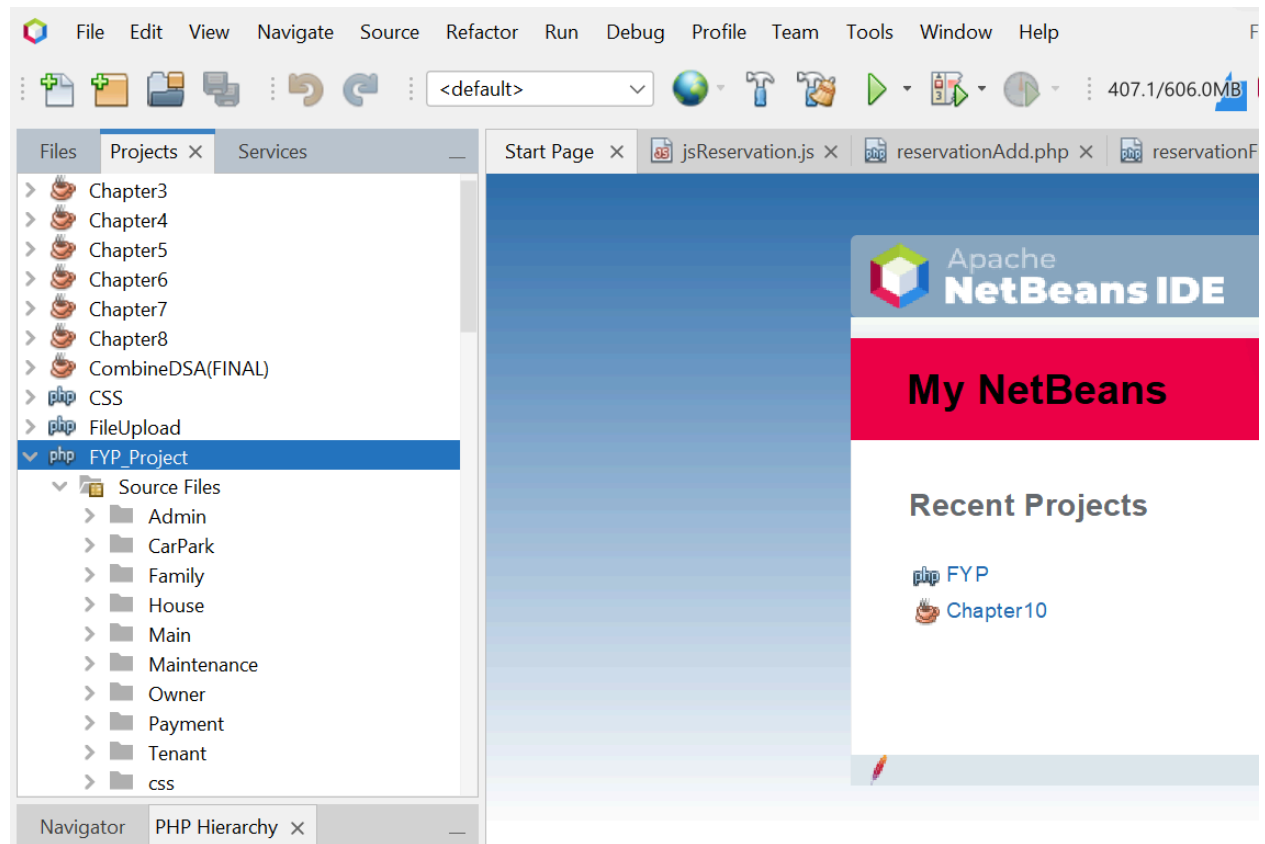

1. Navigate to the download folder, and open the zip file.

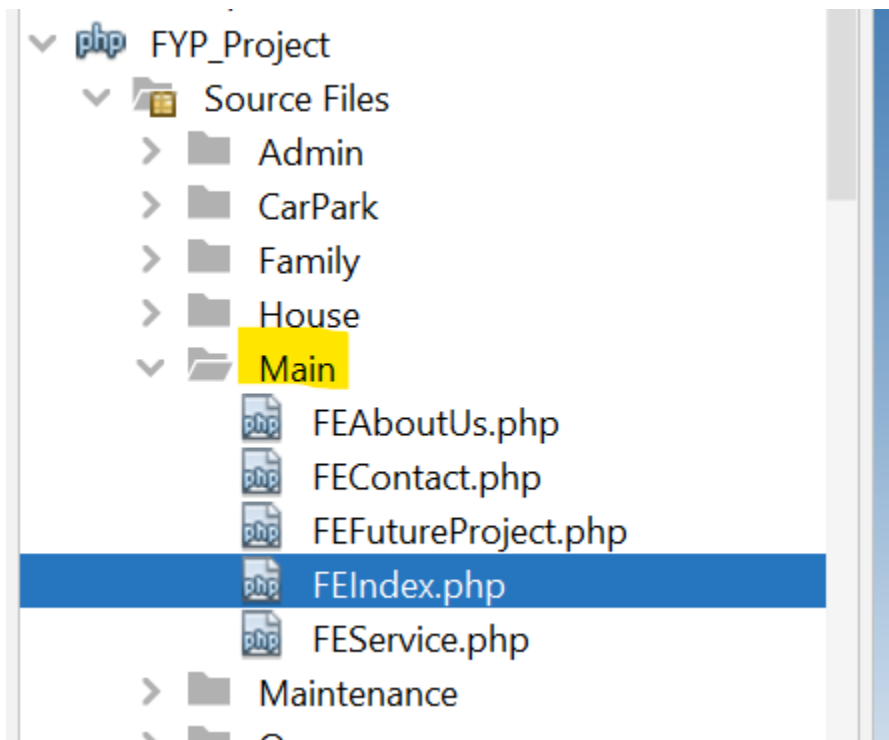

2. Within the extracted folder, relocate to C:\xampp\htdocs.

3. Open NetBeans, and access the FYP_Project folder.

4. Inside the FYP_Project folder, open the Main folder, and run the FEindex.php file.
